

## **Alexa Fluor® 647 anti-human CD209 (DC-SIGN) Antibody**

Human peripheral blood mononuclear cell (PBMC) derived dendritic cells were fixed with 1% paraformaldehyde (PFA) and then stained with 10 µg/ml of CD209 (DC-SIGN) (clone 9E9A8) Alexa Fluor® 647 for 30 minutes at room temperature. Nuclei were counterstained with DAPI and are shown in blue. The image was captured by 40X objective.
