

## **Purified anti-Keratin 14 Antibody**

IHC staining of anti-Keratin 14 antibody (Poly19053) on formalin-fixed paraffin-embedded normal human skin. After antigen retrieval using sodium citrate, the tissue was incubated with the primary antibody at 1 µg/ml for 60 minutes at room temperature. BioLegend's Ultra Streptavidin (USA) HRP Detection Kit was used for detection followed by hematoxylin counterstaining, according to the protocol provided.
